Insider Investigation

1 Context Overview

On 26 March 2026, a refrigerated truck carrying over 400,000 units of KitKat product vanished somewhere between Central Italy and Poland. Nestlé confirmed the theft two days later. The vehicle has not been found.

The European Cargo Threat Assessment (ECTA) does not believe this was opportunistic. A shipment of this size, on a contracted route, does not disappear without someone helping it along.

Following files are given:

File	Description
ecta_memo.pdf	Briefing
exhibit_a.eml	Exhibit A — referenced in the memo
exhibit_b.jpg	Exhibit B — referenced in the memo
transeuro_data/employees.csv	Subpoenaed from TransEuro Logistics IT
transeuro_data/access_log.csv	Subpoenaed from TransEuro Logistics IT
transeuro_data/comms_export.txt	Subpoenaed from TransEuro Logistics IT

Table 1 List of files

2 Analysis

2.1 Files Analysis

The ecta_memo.pdf file was the briefing on the incident.

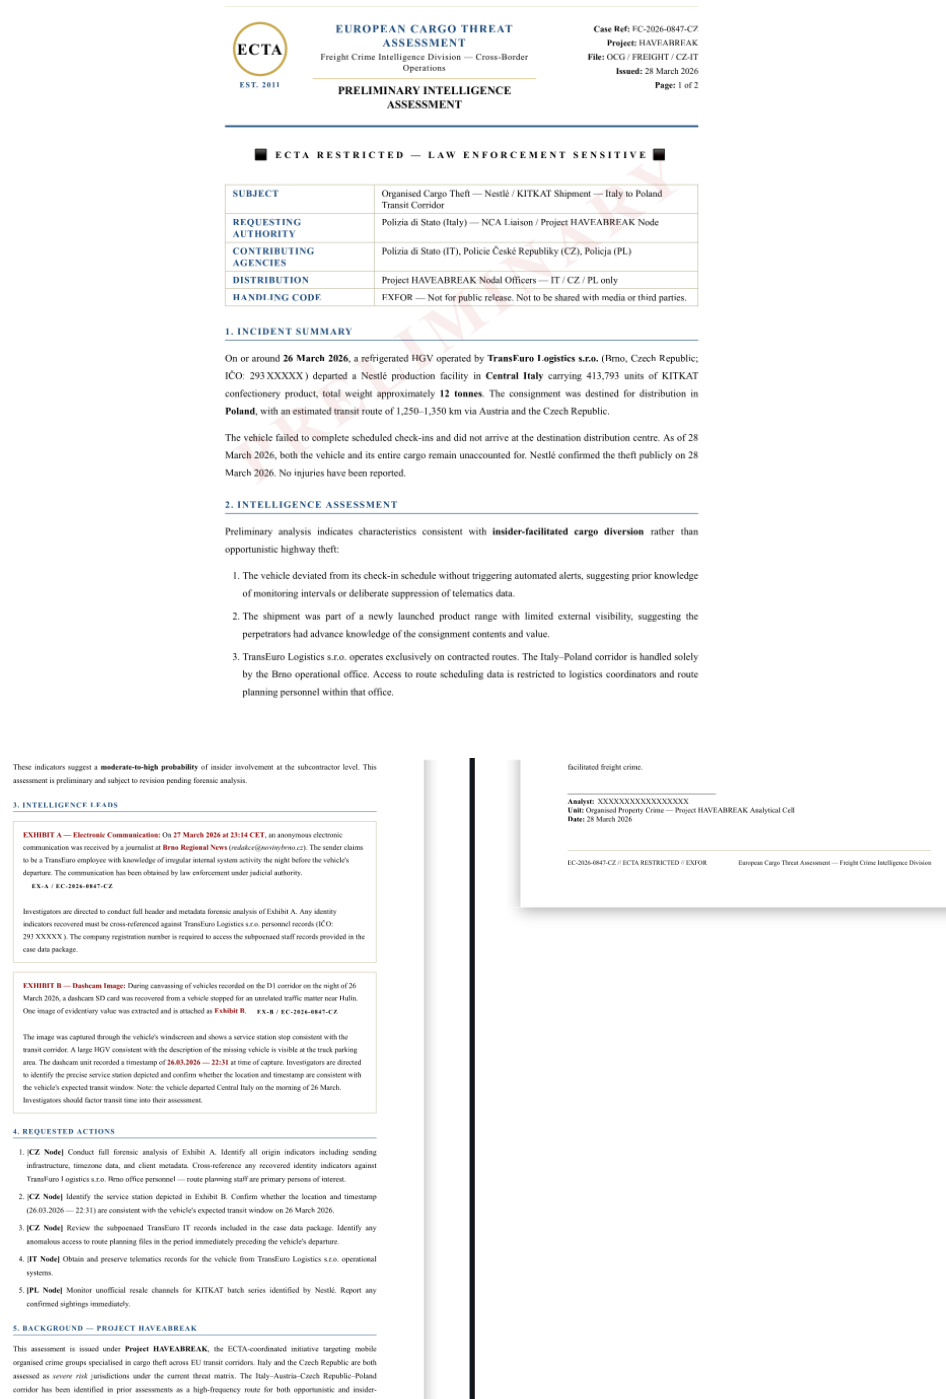

Figure 1 ECTA Memo

Insider Investigation

The memo highlighted that the shipment had limited external visibility, contracted routes and missed check-ins. So, the threat could have been at subcontractor level. This led to two leads. A journalist at Brno Regional News had received an anonymous electronic communication from a person claiming to be a TransEuro employee. Another lead was a picture taken from a car's dashcam in Hulin (Czech Republic) of the HGV (Heavy Goods Vehicle) along the D1 corridor highway.

Figure 2 Exhibit A - Car dashcam

Using google maps, the location traced to Kroměřížská 1281, 768 24 Hulín, Czechia.

Insider Investigation

Following is the timeline of the incidents:

Time	Event
26 March at morning	The HGV departed from Italy
26 March at 22:31	A car's dashcam is Hulin recorded the HGV in the truck parking area of the D1 corridor highway
27 March at 23:14	A journalist at Brno Regional News received an anonymous electronic communication from a person claiming to be a TransEuro employee

Table 2 Timeline of the incidents

The exhibit_a.eml was an email file. Following are some information related to it:

Subject	Information
Recipient	redakce@novinybrno.cz
Timestamp	Thu, 27 Mar 2026 23:14:57
Sender	"Anonymous" <notmyname2847@gmail.com>
Sender IP address	193.32.249.132
Subject	Nestle truck - this was not random

Table 3 Email information

The email content stated that the sender worked in the company responsible for the shipment and confronted that he had noticed unusual activity in the internal system the day before departure. He said that someone had accessed to a file and is afraid of insider threat.

I work for the logistics company that was moving the Nestle shipment.

I do not know who took it or where it is. But I know it was not opportunistic. Someone gave the route details to someone outside before that truck left. I saw unusual activity in our internal system the night before departure. Access to a file that had no reason to be touched at that hour.

I am not going to the police directly. I do not know who to trust inside the company right now. I am sending this to you because you cover local business and I think this should be public.

I cannot say more about who I am.

Figure 5 Access logs

Insider Investigation

2.2 Cuplrit Investigation

In order to investigate the culprit, the following notes from the email were taken:

Date/ Time	Activity
Before the truck left (Before the morning of 26 March)	Someone gave the route details to someone
Night before departure (Night of 25 March)	Someone accessed a file that had no need of access at that time
Thu, 27 Mar 2026 23:14:57	The employee sent the email

Table 4 Notes from the email

The comms_export.txt contained some messages from the employees.

```

=====

[2026-03-15 09:14] br0204@transeuro-log.cz
WK12 and WK13 driver scheduling draft uploaded to the shared
folder. Please review before end of day.

[2026-03-15 09:44] br0291@transeuro-log.cz
Will review this afternoon.

[2026-03-15 10:12] pr0122@transeuro-log.cz
Quick question - do we have an updated contact for the Ferentino
loading bay? The number I have on file keeps ringing out.

[2026-03-15 10:44] br0204@transeuro-log.cz
I will check with Jana and get back to you.

[2026-03-17 11:02] os0047@transeuro-log.cz
Before I take the IT-PL run next week - what is the recommended
overnight stop on the Czech stretch? Last time I used the one
near Olomouc but I was not sure if that is still on the
approved list.

[2026-03-17 11:34] br0204@transeuro-log.cz
Still approved. ORLEN service area on D1, just before the
Olomouc junction. Good overnight parking, 24h fuel. It is
what most drivers use on that corridor.

[2026-03-17 14:05] br0334@transeuro-log.cz
Radoslav - I have the Ferentino contact. Sending separately.

[2026-03-18 08:44] br0204@transeuro-log.cz
Two new stops added to the CZ-PL approved list following driver
feedback. Both verified for overnight capacity. Details in the
route planning folder.

[2026-03-19 16:22] pr0122@transeuro-log.cz
Also flagging - I had a look at the IT-PL route file yesterday
evening, noticed the waypoint list had not been updated since
Q4. Is that intentional or should I update it?

[2026-03-19 16:58] br0291@transeuro-log.cz
I updated it last week. You might be looking at a cached
version. Current file is in the Q1 folder.

[2026-03-21 14:08] os0047@transeuro-log.cz
Vehicle 09 still showing a fault on the rear-left pressure
sensor. Maintenance have cleared it twice and say it is a
ghost reading. I am not taking it on a long haul until it
is properly resolved.

[2026-03-21 14:30] br0291@transeuro-log.cz
Logged with BR-0255. Will follow up.

[2026-03-23 16:05] br0204@transeuro-log.cz
Easter period reminder - reduced driver availability from
18 April. Any priority loads for that window should go to
pr0114 by end of March.

[2026-03-24 09:11] br0255@transeuro-log.cz
Reminder to all staff - personal email addresses must not be
used for accessing or sharing company files. This morning a
request was received from an external address
(kraliknovak09@gmail.com) to access files in the route
planning shared folder. The request was blocked. Please use
your company account for all work-related activity.

[2026-03-24 23:41] br0312@transeuro-log.cz
WK13 driver assignments updated - three changes from the
draft, all confirmed. Notes in the schedule file.

[2026-03-25 09:20] br0204@transeuro-log.cz
Overnight roadworks on D1 between Brno and Vyskov from 20:00
this week. Added a 30 minute buffer to the IT-PL departure
window in the schedule.

[2026-03-25 09:44] br0291@transeuro-log.cz
Noted, thank you.

[2026-03-25 10:22] pr0122@transeuro-log.cz
I keep needing to reference the IT-PL file for the Q2
planning work. Should I get standing read access or keep
requesting each time?

[2026-03-25 10:55] br0255@transeuro-log.cz
I can set up standing VIEW access for the Prague team on
the IT-PL file. Will action this afternoon.

[2026-03-27 09:14] br0204@transeuro-log.cz
Getting access denied on the IT-PL route folder this
morning. Is anyone else seeing this?
```

Insider Investigation

```
[2026-03-27 11:22] br0255@transeuro-log.cz  
There is a temporary restriction on certain route files in  
place from this morning. Management directive. I cannot give  
more detail at this stage.
```

Figure 6 Messages

Following is the summary of the message report:

1. The senior driver (OS-0047) asked about overnight stop and the route planner (BR-0204) suggested Orlen service area on D1 which was just before the Olomouc junction. A week later he confirmed overnight roadworks on D1 between Brno and Vyskov from 20:00 that week and thus 30-minute buffer was added to the departure.
2. The IT systems employee (BR-0255) notified that a personal email address kraliknovak09@gmail.com had accessed files in route planning shared folder on 24th March.
3. On 27th March, one of the employees notified that he was denied the access to the route folder.

Someone had accessed a file on the night of 25th of March. Following were the logs from 25th March:

Figure 7 Access logs from March 25

On 22:14:09, the route planner (BR-0291) had exported the route file. This is a suspicious event as there is no need of exporting this file from a system.

On the morning of the departure, the employee also viewed the driver schedule.

Figure 9 Access logs from March 24

The route planner had failed authentication while trying to access the route planning file. This confirmed that the insider was the route planner.

The personal email used was kraliknovak09@gmail.com. This email was searched in emailosint website.

Insider Investigation

The screenshot displays the EmailOSINT.org interface. At the top, the navigation bar includes the logo, links for Features, Pricing, Use cases, and Blog, along with Sign in and Get started buttons. The search bar contains the email kraliknovak09@gmail.com, with a Search free button. Below the search bar, the results for kraliknovak09@gmail.com are shown, including a New lookup button. The main content area features an AI Profile Summary for the email, synthesized across all sources. It identifies a Google Account and lists several findings: a Google account associated with the email, the account holder's full name (Radovan Blšřák), the account's last active date (April 3, 2026), and no associated data breaches or stealer logs. A risk note indicates a low risk profile. Below the summary, three statistics are displayed: Accounts found (2), First seen (Apr 3, 2026), and Last seen (Apr 3, 2026). The Summary section includes Names Found (Radovan Blšřák, Google) and Profile Pictures (a blue profile picture icon).

Figure 14 Access logs from night of March 25

The route planner (BR-0312) was working at night concurrent to the insider BR-0291.

Therefore he is the one who sent the email.

Insider Investigation

3 Findings

1. The route planner (BR-0291) was responsible for leaking the shipment details.
2. He had exported ROUTE_IT_PL_Q1_2026.pdf file on March 25 at 22:14:09 which confirmed he was leaking the information in that file.
3. He had also tried to use his personal email kraliknovak09@gmail.com from which it was identified that his name was Radovan Blšťák.
4. The anonymous email sender used Mullvad VPN to hide his identity. However, investigating the access logs identified him as the route planner (BR-0312).
